Election/Restrictions

- I. Claims 7, 9, 10, 11, 17-21 and 29-31, drawn to a device for delivering fluid, classified in class 604, subclass 103.01.
 - II. Claims 26-38, drawn to a method for delivering therapeutic into a vessel wall, classified in class 604, subclass 500.
1. Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product. See MPEP § 806.05(h). In the instant case the device can be used in a method different than that as claimed in claims 26 and 27 and the method can employ a fluid delivery device materially different than the device claimed in group I.
 2. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.
